

Dutch Association for Pharmaceutical Medicine

We have supported our members since 1962 in the field of clinical drug research, safety of medicines and medical devices, registration matters and sharing current medical scientific knowledge.

Our goal is to contribute to improving public health from the broad field of pharmaceutical medicine.

An important aspect within the NVFG is the further professionalization of pharmaceutical medicine. Consider, for example, collaboration with the Dutch Association of Physicians, Society and Health (KAMG) in the context of specialist training for doctors within the pharmaceutical industry and the initiative for collaboration with the EMA that is based in Amsterdam.

5 active NVFG committees

- i. Communication
- ii. Committee 'Physicians, Society and Health' (KAMG)
- iii. Treasury
- iv. Event
- v. Appeal

NVFG CLINOPS

Clinical Operations focuses on promoting clinical drug research. The approach for members is pragmatic and focused.

NVFG PPN

The Pharmacovigilance Platform Netherlands (PPN) is for everyone who is concerned with the safety of medicines and medical devices.

NVFG REGNED

RegNed is concerned with the broad field of registration. Key words are intensive information and knowledge exchange and Good Regulatory Practice.

NVFG MEDICAL AFFAIRS

Medical Affairs employees exchange medical scientific knowledge to ensure correct and safe use of medicines.

Dutch Association for Pharmaceutical Medicine

The matrix provides an overview of the various activities that are being carried out by the Medical Affairs Department.

Clinical research is constantly innovating: e-development, RBM, ethics, management, and communication soft skills and even blockchain.

The safe use of medicines is crucial. Various measures are being taken to minimize the risks of the use of a medicine. Some risks require extra measures, like education of doctors, pharmacists and/or patients.

The implementation of the educational material is national matter and needs official approval.

The first edition of the Medical Affairs Day on March 14, 2019. The start of an annual tradition. We consider the challenges facing the Medical Affairs professional.

Adverse reactions to vaccinations.

Screening of Dutch Pharmacovigilance literature.

'Lareb' (Dutch PV institute): organization, latest insights and investigations.
